BIO-ROOT-BOOST

INCREASED NUTRIENT SUPPLY

During different stages of crop growth, the plant needs and uses nutrients that have been stored. Nutrients can get locked up in the soils — Bio-Root -Boost liquid fertilizer helps breakdown and release those nutrients.

Bio-Root Boost is used to help push those stored nutrient's at those critical times where crops are needing a BOOST!

✔ Permanent Crops ✔ Row Crops

BOOSTED BENEFITS

- ▶ Promotes nutrient uptake
- ▶ Better root development
- ▶ Water penetration
- ▶ Plant vigor
- ▶ Increased microbial activity
- ▶ Creates diversity in the soil
- ▶ Promotes plant growth
